 Car Care Repai

The photos in this edition are black and
 white. Mitsubishi's 4G63t engine is among
 the most powerful engines ever in the
 sport-compact world. It's not uncommon to
 find one of these four-cylinder, iron-block,
 aluminum-headed, 2-liter turbocharged
 monsters making more than 1,000
 horsepower with the right modifications
 and tuning - well above the 200-300 hp

produced in the factory-made engines.
 Bolted into such cars as the Mitsubishi
 Lancer Evolution, Eclipse, and Galant, and
 the Eagle Talon and Plymouth Laser, the
 4G63t has more than a cult following
 among sport-compact enthusiasts, who
 know and respect this engine's immense
 performance potential at the track or on
 the street. Up until now, in-depth
 performance information on the 4G63t has
 been hard to find. For this book, author
 Robert Bowen went straight to the source,
 Robert Garcia of Road/Race Engineering in
 Santa Fe Springs, California. RRE is the
 most well-known and respected Mitsubishi
 turbo performance shop in the United
 States, and Garcia is its in-house engine
 builder. Mitsubishi enthusiasts will benefit
 from Garcia's expertise and be able to
 build better, stronger engines than ever
 before. "How to Build Max-Performance

Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path. Paperbound Books in Print Chilton Book Company

Covers all U.S. and Canadian models of Cordia, Galant, Mirage, Montero, Pick-up, Precis, Sigma, Starion and Tredia.
