This book is a legacy to our children and grandchildren..However, since they have not been incarnated on this Earth yet, it is our pleasure to share it with the reader!Dear reader, The journey you are about to embark on is of an abstruse nature. In front of you is a collection of imaginative drawings or comic strips, if you will. These visions have been summoned from the unconscious and subconscious mind of my husband. All of the drawings were drawn in a matter of minutes with both his left and right hand (both brain hemispheres) simultaneously. The surreal images appear on paper as some sort of auto-drawing, where the

subject/theme/dreamscape of the drawing is not premeditated. It is drawing in the moment, while the pen is gliding over the paper..(no pencils, no erasing, no pausing to think.) Pure stream of (un)consciousness; instant mind to paper.The original drawings were created by him in black ink on white paper, to later be scanned into the computer and colored digitally by moi. It has become a collaborative work of two minds working together. The characters hidden in the book are unique, have a life and a world of their own and are inviting you to take a holiday in their realm. Lose your sense of time and urgency getting lost in reverie. Find the hidden riddles and questions each vision postulates. Get lost in a dreamworld, where the surreal and abstract reign whilst all the rules of

conventional art and aesthetic are parodied. Let the characters and their environments tickle your own imagination while you watch the them live similar lives to ours: they wander, they wonder, they are confused and pensive, they get angry and fall in love, they have their own dreams within dreams...they are just like us but just a bit strange and silly. They wear their emotions and thoughts on their visages. Their appearances merge with their thoughts. Inner space and outer space are married on paper.Welcome to our world! the White Bread coupl

Bobby Monks is blowing the whistle on Wall Street, giving middle class Americans the low down on how they're being fleeced of their retirement money—and what they can do about it. Every month our financial statements arrive, and every month we glance at them, trying to understand, hoping that we'll come out ahead. But most of us have no idea what's really going on or the costs involved. According to Bobby Monks—who has been a banker and borrower, investor and entrepreneur—financial firms and money managers have complicated the investing process to keep us in the dark, profiting from our ignorance. Having dealt with the financial sector throughout his career, Monks has seen it all. In *Uninvested*, he reveals how, when, and why the relationship between us and our money managers became corrupted—and what we can do to fix it. Monks shows how the system works not only against us as individuals but also against society at large. Without our knowledge or approval, our money is diverted into the pockets of CEOs and misappropriated, promoting business practices that contribute to economic inequality, political dysfunction, and environmental woe. Monks' experiences give him a unique perspective on how we got to this point. Drawing on original research and interviews with key figures such as Vanguard founder Jack Bogle, legendary investor Carl Icahn, and former congressman Barney Frank of the

Dodd-Frank Act, Monks teaches us how to take back ownership and control of our money. As he writes: Even in the decades preceding the most recent downturn, very few investors enjoyed financial success equal to that of their money managers. Given this, I have long wondered why investors don't pull their money out of the system en masse. I suspect that it is because most feel powerless. Unaware of the implications of their investments and unable to penetrate the excruciating complexity of the system that facilitates them, many seem to seek refuge in their money managers' aura of sophistication, pretense of competence, and projection of certainty. It seems to me that most investors are simply sleepwalking through the investing process. They have become uninvested. When we outsource our investing, we sacrifice control—but not responsibility. My goal in writing this book is to convince you that the best (and only) way to fix this broken system is to awaken a critical mass of engaged investors and recruit them to participate more fully in the investing process.
