Make no mistake trading is a dead serious business and you should treat that way. You as a retail futures and Forex investor or trader have a limited chance of having a positive outcome in the live market against the best market participants in the world, not to mention having to try to make money from the machines. It is said that 70% of the market making is done by super computers now. You can't beat them however you can train yourself to see what they are doing on a price chart and then make money with them. Power Trading will be an excellent introduction for someone who has very little experience in the financial markets for what they can expect to research and learn if they want to have any chance at being successful making real money in the live markets. If you're brand new at trading futures and Forex, Power Trading will give you a head start, if you have a little knowledge already I hope Power Trading can give you more information and help you learn something new and help you become consistently profitable. The reason Power Trading is unique is that it is going to tell you about who your competition is

and how you can beat them, what you need to study first that will make you rich fast, where you need to go to get consistently profitable quickly, when you should and should not be in the live market the other information you need to know to be able to trade and invest in today's financial markets (or any tradable market) with confidence and zero fear. Power Trading is about giving you the best information you need to really give you a fighting chance at becoming successful in the futures and Forex trading business. I try to keep industry jargon to a minimum and give links to locations where more education and training information can be found online and for free. The advanced techniques in Power Trading will empower you to develop an edge over your competition in the live markets, which by the way, is everyone except you.

Are you tired of forex trading courses, forex strategies, forex trading systems and books that don't really teach you how to trade and make money? This book does not waste your time with boring stories and basic, general information just to fill up pages! "Trading The Forex Market - Repeating Setups That Beat Your Broker", is a complete comprehensive forex trading guide that's suited for all experience levels & covers all of the important aspects you need to succeed. Whether you trade short term or longer term, these forex trading strategies will turn your trading around to profitability very quickly. The forex market has repeatable setups that happen over & over, that is the foundation of the strategies. These favorable price action setups are also combined with specific indicators & candle patterns that all work very well at confirming each other. There is absolutely no silly stuff in the course such as "magical theories" and page after page of useless information. These techniques and this forex trading education will have you trading like a true professional and develop your trading mind around the WHOLE trade, so you will become a trader, not just a strategy user! Many forex traders

use too many indicators and rely solely on them, this is a big mistake and contributes to most of your losses. The reason is that the indicators were not created for 24 hour trading like the forex market, and because they need to be combined with other techniques such as price action because they lag behind price. This forex trading course will show you how to use only a handful of indicators & put your efforts into spotting the repeatable setups that are right in front of you all the time. That's where the big money is. From scalping the forex market to trading medium & longer term, you're covered. The EUR/USD trade using the United States Dollar Index as the entry and the Ultimate Moving Average Play are two of the forex strategy highlights in the course. They allow you to profit thousands of pips a year! Good forex strategies are only a small part of the forex trading game and this course. Without proper forex trading education, money management & overall trade management, the best forex strategies will do you absolutely no good at all! Sections on management of your money & trades are included & will teach you how to keep losses to a minimum of 1%-3% no matter the size of your account. You will also learn techniques on how to form timely exit opinions for any forex strategy which is very important & has the biggest impact on your trading success along with proper trade management. Exits are not talked about a lot in the forex market for some reason, everyone is only interested in strategies. This is another big mistake traders make, but this forex trading guide covers that & a whole lot more making it possible for you to become an all around excellent trader. The author Larry Palmer, is an experienced trader who started his career in the stock market and has taught his forex

trading techniques and money/trade management guidelines to traders from all around the world. He is the founder of [www.1on1fx.com](http://www.1on1fx.com)
