This book is intended to introduce the principles of the Event-Driven and Service-Oriented Architecture (SOA 2.0) and its role in the new interconnected world based on the cloud computing architecture paradigm. In this new context, the concept of “service” is

widely applied to the hardware and software resources available in the new generation of the Internet. The authors focus on how current and future SOA technologies provide the basis for the smart management of the service model provided by the Platform as a Service (PaaS) layer.

Mathematics in Life American Bar Association

This volume constitutes the published proceedings of the 17th International Conference on Information Systems Development. They present the latest and greatest concepts, approaches, and techniques of systems development - a notoriously transitional field.

The Model Rules of Professional Conduct

provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Do you need to get up to date with the world's most popular networking technology? With this resource you will discover everything you need to know about Ethernet and its implementation in

the automotive industry. Enhance your technical understanding and better inform your decision-making process so that you can experience the benefits of Ethernet implementation. From new market opportunities, to lower costs, and less complex processes; this is the first book to provide a comprehensive overview of automotive Ethernet. Covering electromagnetic requirements and physical layer technologies, Quality of Service, the use of VLANs, IP, and Service Discovery, as well as network architecture and testing, this unique and comprehensive resource is a must have, whether you are a professional in the automotive industry, or an academic who needs a detailed overview of this revolutionary technology and its historical background.

Priorities MAA

Since the financial crisis, one of the key priorities of the Financial Conduct Authority (FCA) and Prudential Regulation Authority (PRA) has been individual accountability. This book addresses the regulatory and employment law challenges that arise from the FCA's and PRA's requirements. The expert team of writers examine in depth the provisions of the Financial Services and Markets Act 2000 which relate to individuals, and the associated requirements of the PRA and FCA. The topics addressed include: The Senior Manager, Certification and Approved Person Regimes Regulatory references and whistleblowing Disciplinary investigations, enforcement and sanctions Notifications, 'Form C', and

fitness & propriety Bonus disputes and the Remuneration Code Conduct and Pay in the Financial Services Industry considers the full extent of an individual's employment, from pre-contractual discussions to the post-termination clawback of remuneration. It is a vital reference for lawyers and human resources professionals working within the financial services industry, both in-house and in private practice. It will also be of interest to all academics, regulators and policy-makers involved in this sector.

Presents a wide sampling of efforts being made on campuses across the country to

achieve our common goal of having a quantitatively literate citizenry.

Knowledge Management in Organizations Maximum Press

Do you need a one-volume lesson about business applications of the Internet and other computer-based hardware and software? This book provides comprehensive coverage of four major areas: The Internet and Data Communications Basics, Popular Types of Networks, Design, Implementation, and Management Issues in a Network Environment, and Data Communication and Internet Applications. The Handbook of Business Data Communications looks briefly at the major corporations working in each category. In addition to practical examples, short case studies, and summaries of emerging issues in data

communications, Professor Bidgoli discusses personal, social, organizational, and legal issues surrounding the use of networks and business software. Easy to use, balanced, and up-to-date, the Handbook has both answers and insights into future trends in business data communications. Key Features * An industry profile begins each chapter, providing readers with ways to learn more about the products they use * Numerous case studies of businesses throughout the book highlight applications topics * Includes balanced presentations of current and emerging technologies as well as useful discussions of security issues and measures * Presents thorough examinations of the Internet and

intranets/extranets * Social, organizational, and legal materials provide context for data communications information * Summaries and review questions reinforce the aims of each chapter

This book constitutes the refereed proceedings of the 7th Metadata and Semantics Research Conference, MTSR 2013, held in Thessaloniki, Greece, in November 2013. The 29 revised papers presented were carefully reviewed and selected from 89 submissions. The papers are organized in several sessions and tracks. The sessions cover the following topics: platforms for research datasets, system architecture and data management; metadata and ontology validation, evaluation, mapping and interoperability; content management.

The tracks cover the following topics: big data and digital libraries in health, science and technology; European and national projects and project networking; metadata and semantics for open repositories, research information systems and data infrastructures; metadata and semantics for cultural collections and applications; metadata and semantics for agriculture, food and environment.

Conduct and Pay in the Financial Services Industry Harpercollins College Division

This book contains the refereed proceedings of the 10th International Conference on Knowledge Management in Organizations, KMO 2015, held in Maribor, Slovenia, in August 2015. The theme of the conference was

"Knowledge Management and Internet of Things." The KMO conference brings together researchers and developers from industry and academia to discuss how knowledge management using big data can improve innovation and competitiveness. The 59 contributions accepted for KMO 2015 were selected from 163 submissions and are organized in topical sections on: knowledge management processes, successful knowledge sharing and knowledge management practices, innovations for competitiveness, knowledge management platforms and tools, social networks and mining techniques, knowledge management and the Internet of Things, knowledge management in health care, and knowledge management in education

and research.
