USMLE Road Map Neuroscience, Second Edition Lippincott Williams & Wilkins

High Price is the harrowing and inspiring memoir of neuroscientist Carl Hart, a man who grew up in one of Miami's toughest neighborhoods and, determined to make a difference as an adult, tirelessly applies his scientific training to help save real lives. Young Carl didn't see the value of school, studying just enough to keep him on the basketball team. Today, he is a cutting-edge neuroscientist—Columbia University's first tenured African American professor in the sciences—whose landmark, controversial research is redefining our understanding of addiction. In this provocative and eye-opening memoir, Dr. Carl Hart recalls his journey of self-discovery, how he escaped a life of crime and drugs and avoided becoming one of the crack addicts he now studies. Interweaving past and present, Hart goes beyond the hype as he examines the relationship between drugs and pleasure, choice, and motivation, both in the brain and in society. His findings shed new light on common ideas about race, poverty, and drugs, and explain why current policies are failing.

Practical Echocardiography John Wiley & Sons

Practical Echocardiography is a highly illustrated guide to the principles and practice of echocardiography written by cardiologists, radiologists and radiographers for all healthcare professionals needing to learn the techniques and interpretative skills involved in the scanning of the heart. It includes discussion of the main applications of echocardiography in the diagnosis of acquired heart disease, but also has specialist chapters on less common techniques, such as transoesophageal echo and the use of echocardiography in the investigation of congenital heart disease. The combination of emphasis on technique as well as diagnosis makes this book especially valuable to trainee clinicians,

be they cardiologists, cardiac surgeons or radiologists, as well as the radiographer who (especially in the UK) will often be the person to perform the investigation.
