[Queen Takes More](#) Createspace Independent Publishing Platform

This book presents the consensus findings of the ISAKOS Shoulder Committee regarding the treatment options in patients suffering from shoulder pain and reduced function or dead arm syndrome as a consequence of rotator cuff injuries. The aim is twofold: to equip readers with a precise knowledge of the presenting characteristics of these injuries in different age groups and to describe in detail the initial management and surgical and non-surgical approaches, taking into account the age-specific features. Readers will find clear descriptions of all the latest arthroscopic techniques, which allow repair of even the largest tears. The indications for and performance of tendon transfer procedures, biceps tenotomy, tenodesis, hemiarthroplasty, anatomic shoulder arthroplasty, reverse total shoulder arthroplasty, and revision surgery are explained. Helpful guidance is also provided on the use of strategies to promote rotator cuff healing, including stem cell therapy and scaffolds. The authors are leading experts in the field, and the book will be of value for all shoulder surgeons and orthopaedic trainees and consultants, as well as sports medicine specialists.

How institutions and individuals can address complex social, financial, and environmental problems on a systemic level—and invest in a more secure future. Investment today has evolved from the basic, conventional approach of the past. Investors have come to recognize the importance of sustainable investment and are more frequently considering environmental and social factors in their decisions. Yet the complexity of the times forces us to recognize and transition to a third stage of investment practice: system-level investing. In this paradigm-shifting book, William Burckart and Steve Lydenberg show how system-level investors support and enhance the health and stability of the social, financial, and environmental systems on which they depend for long-term returns. They preserve and strengthen these fundamental systems while still generating competitive or otherwise acceptable performance. This book is for those investors who believe in that transition. They may be institutions, large or small, concerned about the long-term stability of the environment and society. They may be individual investors who want their children and grandchildren to inherit a just and sustainable world. Whoever they may be, Burckart and Lydenberg show them the what, why, and how of system-level investment in this book: what it means to manage system-level risks and rewards, why it is imperative to do so now, and how to integrate this new way of thinking into their current practice. “Burckart and Lydenberg are the Wayne Gretzkys of investing: Showing us not where investing is, but where it's going.” —Jon Lukomnik, Managing Partner, Sinclair Capital; Senior Fellow, High Meadows Institute

The basic principles are the same, but the theories, techniques, and instrumentation have dramatically improved. The Cowboy's Companion: A Trail Guide for the Arthroscopic Shoulder Surgeon is truly a companion book to Burkhart's View of the Shoulder: A Cowboy's Guide to Advanced Shoulder Arthroscopy, which builds on the principles of the first book and concentrates on the new theories and techniques that have developed since the first book was written. The book is separated into two sections: The Shoulder Roundup, which will be an update on the techniques and ideas that have developed in shoulder surgery and The Shoulder Rodeo, which will be a collection of challenging cases that demonstrate unique approaches to difficult shoulder problems. The text comes with two DVDs that feature advanced interactive technology.
