Multiple Perspectives on Difficulties in Learning Literacy and Numeracy Waxmann Verlag
 There are many approaches to researching the difficulties in learning that students experience in the key areas of literacy and numeracy. This book seeks to advance understanding of these difficulties and the interventions that have been used to improve outcomes. The book addresses the sometimes complementary and sometimes contradictory results, and generates new approaches to understanding and serving students with difficulties in literacy and numeracy. The book represents a departure from conventional wisdom as most scholars and graduate students draw upon ideas from only one of the three domains focal in the book and usually from one single or dominant theoretical frame. Typically, readers will affiliate with reading education, mathematics education, or learning disabilities and belong to one of the corresponding professional associations such as IRA, NCTM, or CLD. This book's scope will open a scholarly forum for engaging readers with a familiarity with one of these domains while providing insight into the others on offer in the book.

Teaching and Learning in Multilingual Contexts Addison-Wesley Longman
 This book offers a comprehensive overview of current, innovative approaches to assessing generic and domain-specific learning outcomes in higher education at both national and international levels. It discusses the most significant initiatives over the past decade to develop objective, valid, and reliable assessment tools and presents state-of-the-art procedures to adapt and validate them for use in other countries. The authors highlight key conceptual and methodological challenges connected with intra-national and cross-national assessment of learning outcomes in higher education; introduce novel approaches to improving assessment, evaluation, testing, and measurement practices; and offer exemplary implementation frameworks. Further, they examine

the results of and lessons learned from various recent, world-renowned research programs and feasibility studies, and present results from their own studies to provide new insights into how to draw valid conclusions about learning outcomes achieved in various contexts.

Kindergarten Review Assn for Supervision & Curriculum

The priority program 'The educational quality of schools' has been established seven years ago by the German Research Foundation (DFG). The projects in this program investigated conditions inside and outside of school and their impact on the development of mathematical, scientific, and cross-curricular competencies. In this book major findings of the program are presented. The projects not only give an overview of their research questioning methods and findings, but also of approaches and materials that have been developed to support learning and teaching in mathematics and science class rooms. The studies reported here identify factors for weaknesses in the educational outcomes that became apparent in the international comparisons like TIMSS and PISA. The projects, however, provide empirically substantiated units on approaches that can help to improve the educational quality of schools. [Publisher, ed].

Awareness Language in Ts Allyn & Bacon

It is clearly illogical to search for one good, universal solution for multilingual education when educational contexts differ so widely due to demographic and social factors. The situation is further complicated by the motivations of learners and teachers, and by attitudes towards multilingualism and 'otherness'. The studies in this volume seek to investigate not only whether certain solutions and practices are 'good', but also when and for whom they make sense. The book covers a wide range of Western multilingual contexts, and uncovers common themes and practices, shared aims and preoccupations, and often similar solutions, within seemingly diverse contexts. In addition to chapters based on empirical data, this book offers theoretical contributions in the shape of a

discussion of the appropriateness of L1-Ln terminology when discussing complex multilingual realities, and looks at how the age factor works in classroom settings.

Classroom Management for Elementary Teachers Cambridge University Press

This book of eight separately authored chapters is intended to provide teachers and other educators with assistance in finding ways to improve student discipline by establishing and maintaining an effective learning environment. The first three chapters stress the teacher's role. Chapter 1 describes the planning, implementation, and maintenance of strategies for preventing behavior problems; chapter 2 discusses differences between managing groups and handling individual problems; and chapter 3 surveys the range of information an adequate classroom management training program must include. Chapter 4 deals with meeting the special needs of students, touching specifically on assessment and referral and on special programs and services. The fifth chapter examines the important relationship between teachers' intentions and the results of their actions, and presents methods for improving student-teacher communication. The last three chapters explore the educational environment's effect on behavior. Chapter 6 analyzes the different management styles required by different student groupings; chapter 7 probes the ways schools can be organized to encourage development of good behavior habits in students; and the last chapter describes relationships between schools' organizational characteristics and their behavioral objectives. This book is unique because it explores the multilingual lexicon by providing insights from research studies conducted in psycholinguistics, applied linguistics and neurolinguistics. It goes beyond the use of two languages and thus concentrates on a new and developing area in linguistic research. The different perspectives provide a link to the mainstream work on the lexicon and vocabulary acquisition and will stimulate further debate in these areas and in the study of multilingualism.

Studies on the educational quality of schools Waxmann Verlag

This volume brings together the latest findings from research on multilingual language learning and use in multilingual communities. Suzanne Flynn, Håkan Ringbom and Larissa Aronin are some of the prestigious scholars who have contributed to this book. As argued by this last author in her chapter, although multilingualism has always existed, the important changes that research on this phenomenon has recently undergone, like that of adopting a multilingual perspective in its studies, should always be borne in mind. This volume considers the languages of multilingual communities, as well as the interaction among them. As such, the chapters adopt a multilingual approach that guides the analysis of grammatical, lexical and pragmatic development together with the role of affective and social factors in multilingual settings. Furthermore, this edited monograph is not restricted to an age group in the scope of its studies, as it contains research on children, teenagers, young adults and adults. In addition, it covers a wide range of sociolinguistic settings, including

English-speaking countries, like the United Kingdom and Canada, and Northern and Central European contexts such as Sweden and Germany, as well as Southern settings like Spain and Tunisia. This book will be relevant to both researchers and teachers due to its educational and sociolinguistic orientation, dealing as it does with language learners from various multilingual communities and describing the social representation of languages and the measures for their promotion.

Professional judgement and decision making are central to social work, both in everyday professional practice and in public perceptions of social work as a profession. This book examines key issues that are relevant today. The chapters cover child protection, mental health, and elder care settings in Europe, Australia and Canada. They discuss organisational and cultural contexts for professional judgement; the role of experience in the development of expertise and professional discretion; understanding variability in decision making; and the role of legal frameworks in decision making. This book will enable practitioners, managers, policy makers, and researchers to appreciate the complexities of professional judgement and decision making in different social work settings and to apply this understanding to their own practice. This book was originally published as a special issue of the *Journal of Social Work Practice*. The book is linked to sister text *Risk in Social Work Practice: Current Issues*, which examines key debates around the understanding of risk in contemporary social work practice.

*Lehrer*innenbildung im Kontext leistungsbezogener Heterogenität und Mehrsprachigkeit von Schüler*innen* Springer Science & Business Media

Die zunehmende leistungsbezogene Heterogenität und sprachliche Vielfalt in deutschen Schulklassen stellt Lehrer*innen und damit auch die Lehrer*innenbildung vor neue Aufgaben. Der konstruktive und produktive Umgang mit der Heterogenität der Schüler*innen erfordert von (angehende) Lehrkräfte nicht zuletzt auch den Erwerb von spezifischem Wissen bzw. spezifischen Kompetenzen. Der vorliegende Band setzt hier an und arbeitet für erste Phase der Lehrer*innenbildung unterschiedliche Ansatzpunkte für die Bearbeitung dieser Anforderungen heraus. Neben konkreten Vorschlägen für die Entwicklung von Curricula an Universitäten werden Seminarkonzepte reflektiert und Ergebnisse von Studien berichtet. Darüber hinaus liefert der vorliegende Band Impulse für Lehrkräfte und Führungspersonlichkeiten an Schulen, wie sie im unterrichtlichen Alltag diesen Entwicklungsaufgaben evidenzbasiert begegnen können.
