A stimulating, eclectic account of new media that finds its origins in old media, particularly the cinema. In this book Lev Manovich offers the first systematic and rigorous theory of new media. He places new media within the histories of visual and media cultures of the last few centuries. He discusses new media's reliance on conventions of old media, such as the rectangular frame and mobile camera, and shows how new media works create the illusion of reality, address the viewer, and represent space. He also analyzes categories and forms unique to new media, such as interface and database. Manovich uses concepts from film theory, art history, literary theory, and computer science and also develops new theoretical constructs, such as cultural interface, spatial montage, and cinegratography. The theory and history of cinema play a particularly important role in the book. Among other topics, Manovich discusses parallels between the histories of cinema and of new media, digital cinema, screen and montage in cinema and in new media, and historical ties between avant-garde film and new media. *An Introduction to Visual Culture* Castrovilli Giuseppe

Musicians, both fictional and real, have long been subjects of cinema. From biopics of composers Beethoven and Mozart to the rise (and often fall) of imaginary bands in *The Commitments* and *Almost Famous*, music of all types has inspired hundreds of films. The *Encyclopedia of Musicians and Bands on Film* features the most significant productions from around the world, including straightforward biographies, rockumentaries, and even the occasional mockumentary. The wide-ranging scope of this volume allows for the inclusion of films about fictional singers and bands, with emphasis on a variety of themes: songwriter-band relationships, the rise and fall of a career, music saving the day, the promoter's point of view, band competitions, the traveling band, and rock-based absurdity. Among the films discussed in this book are *Amadeus*, *The Blues Brothers*, *The Buddy Holly Story*, *The Commitments*, *Dreamgirls*, *The Glenn Miller Story*, *A Hard Day's Night*, *I'm Not There*, *Jailhouse Rock*, *A Mighty Wind*, *Ray*, *'Round Midnight*, *The Runaways*, *School of Rock*, *That Thing You Do!*, and *Walk the Line*. With entries that span the decades and highlight a variety of music genres, *The Encyclopedia of Musicians and Bands on Film* is a valuable resource for moviegoers and music lovers alike, as well as scholars of both film and music.

The Double McGraw-Hill Humanities, Social Sciences & World Languages

This book is a first attempt to map the broad context of performance studies from a multimodal perspective. It collects original research on traditional performing arts (theatre, dance, opera), live (durational performance) and mediated/recorded performances (films, television shows), as well as performative discursive practices on social media by adopting several theories and methodologies all dealing with the notion of multimodality. As a mostly dynamic and also interactive environment for various text types and genres, the context of performance studies provides many opportunities to produce meaning verbally and non-verbally. All chapters in this book develop frameworks for the analysis of performance-related events and activities

and explore empirical case studies in a range of different ages and cultures. A further focus lies on the communicative strategies deployed by different communities of practice, taking into account processes of production, distribution, and consumption of such texts in diverse spatial and temporal contexts.

A History of Narrative Film Penguin

Near to one billion people call slums their home, making it a reasonable claim to describe our world as a 'planet of slums.' But how has this hard and unyielding way of life been depicted on screen? How have filmmakers engaged historically and across the globe with the social conditions of what is often perceived as the world's most miserable habitats? Combining approaches from cultural, globalisation and film studies, Igor Krstic outlines a transnational history of films that either document or fictionalise the favelas, shantytowns, barrios populares or chawls of our 'planet of slums', exploring the way accelerated urbanisation has intersected with an increasingly interconnected global film culture. From Jacob Riis' *How The Other Half Lives* (1890) to Danny Boyle's *Slumdog Millionaire* (2008), the volume provides a number of close readings of films from different historical periods and regions to outline how contemporary film and media practices relate to their past predecessors, demonstrating the way various filmmakers, both north and south

of the equator, have repeatedly grappled with, rejected or continuously modified documentary and realist modes to convey life in our 'planet of slums'.

Communication Mosaics: An Introduction to the Field of Communication Univ of California Press

What do we know about ordinary people in our towns and cities, about what really matters to them and how they organize their lives today? This book visits an ordinary street and looks into thirty households. It reveals the aspirations and frustrations, the tragedies and accomplishments that are played out behind the doors. It focuses on the things that matter to these people, which quite often turn out to be material things - their house, the dog, their music, the Christmas decorations. These are the means by which they express who they have become, and relationships to objects turn out to be central to their relationships with other people - children, lovers, brothers and friends. If this is a typical street in a modern city like London, then what kind of society is this? It's not a community, nor a neighbourhood, nor is it a collection of isolated individuals. It isn't dominated by the family. We assume that social life is corrupted by materialism, made superficial and individualistic by a surfeit of consumer goods, but this is misleading. If the street isn't any of these things, then what is it? This brilliant and revealing portrayal of a street in modern London, written by one the most prominent anthropologists, shows how much is to be gained when we stop lamenting what we think we used to be and focus instead on what we are now becoming. It reveals the forms by which ordinary people make sense of their lives, and the ways in which objects become our companions in the daily struggle to make life meaningful.
