Marvel's Doctor Strange: The Junior Novel iUniverse

The Acts of Creation is a workbook that illustrates the tools and activities for expanding the intuitive, psychic, and spiritual senses, utilizing hands-on projects. While primarily designed to be used by adults who work and/or live with children, it can also be utilized by anyone who wishes to expand their metaphysical/scientific awareness. This publication synthesizes contemporary and historical knowledge and my personal experiences in the areas of metaphysics, quantum physics, parapsychology and radionics. Bridging metaphysics and science together is a main consideration of this publication developing into a concept I call Spiritual Sciences. This book includes experts in fields of parapsychology, quantum physics, psychology and metaphysics and their research that is utilized to bring unfamiliar knowledge to the forefront. Included is new information on zero-point energy technology and the Indigo children. As you become more involved in the processes in this workbook, you learn to create a stronger connection with the super conscious self. In turn, this workbook clarifies the relationship between the individual personality and the sacred enlightened self, the Over-Soul. This connection will expand your awareness of other intelligent life in the universe. As a learning specialist, I bring to this publication a professional and practical viewpoint to the parameters of Affective education. This methodology addresses the developmental levels of children creating a curriculum that expresses creativity, exploration and the spark that ignites new experiences, accelerating consciousness to the next level of awareness. The intuitive processes learned from this workbook will assist individuals in providing a clearer understanding of the subtle mechanics of the intuitive, psychic and spiritual senses. This knowledge will make the understanding of one's life goals more insightful, personal abilities stronger and spiritual dynamics clearer.

Scotty Bowman is renowned as the best coach in hockey history, and one of the greatest coaches in all of sports. He won more games and more Stanley Cups than anyone else. Remarkably, he coached at the very top for more than four decades with twenty-nine years between his first and last Cup wins. And he's seen more than anyone in hockey. With his precious standing room pass to the Montreal Forum, he saw 'Rocket' Richard play at his peak every Saturday night. He saw Gordie Howe as a seventeen-year-old just starting out. He scouted Bobby Orr as a thirteen-year-old in Parry Sound, Ontario. He coached Guy Lafleur and Mario Lemieux. He coached against Wayne Gretzky. For the past decade, as an advisor for the Chicago Blackhawks, he has watched Sidney Crosby, Alex Ovechkin, and Connor McDavid. He has seen it all up close. Ken Dryden was a Hall-of-Fame goaltender with the Montreal Canadiens. His critically acclaimed and bestselling books have shaped the way we read and think about hockey. Now

Unlock the mystery and magic of sacred geometry to create mandalas using ancient design principles. Pythagoras believed that mathematical truths shift the psyche closer to divine perfection. The Fibonacci sequence has been found to exist in patterns throughout nature. C. G. Jung thought that contemplating the mandala could unveil the unconscious. The designs here draw on the vast history and knowledge once thought esoteric, now available as tools for cultivating spiritual and psychological well-being. Create your own mandala based on geometry, numbers, and signs, or color a mandala as a meditative process to tap into your creativity and intuition. However you use this guide, geometry can be a pathway to grasping who you are, where you belong, and what you are to do. Discover how this timeless practice can help you on your journey of self-realization!

Tsongkhapa's commentary entitled A Book of Three Inspirations: A Treatise on the Stages of Training in the Profound Path of Naro's Six Dharmas is commonly referred to as The Three Inspirations.

Anyone who has read more than a few books on Tibetan Buddhism will have encountered references to the Six Yogas of Naropa, a preeminent yogic technology system. The six practices—inner heat, illusory body, clear light, consciousness transference, forceful projection, and bardo yoga—gradually came to pervade thousands of monasteries, nunneries, and hermitages throughout Central Asia over the past five and a half centuries.
