The wedge-shaped V12 Lamborghini flagships were always spectacular – in shape, sound and performance. The Murciélago was an evolution of the Countach and the Diablo, and was as iconic in its time as its illustrious predecessors were in theirs. This book examines the Murciélago in detail, while casting a look back through Lamborghini's troubled history, to understand how the Murciélago came into being. Ferruccio Lamborghini, Patrick Minram, Megatech, Chrysler, and finally VW-Audi, all

played their part in the birth of this modern classic. The book touches on the people and organisations involved in the production of this iconic car, before examining each of the model variants, and discusses the joys and tribulations of ownership.

The Lotus Europa was Colin Chapman and Lotus's first mid-engined road car, and was produced from 1966 through to 1975. Originally designed to slot into the Lotus range below the Elan as a low cost replacement for the Lotus 7, the Europa eventually sat

alongside the Elan and Plus 2 as a comparable sports car in its own right. Starting with the design philosophy behind the development of the Europa, this book provides detailed technical descriptions of all the major versions of the model, starting with the Renault-powered Series 1 through to the Lotus Twin Cam powered Special. It looks at the cars on the road, and the racing Type 47 derived from the road cars which competed in the small capacity Group 6 class, as well as featuring in historic racing today. With owners' impressions and interviews with ex-Lotus employees, the book provides a valuable insight into owning, running, and

racing these iconic cars.

There has been no more beloved liner than the Queen Elizabeth 2. The last

liner to be built on British soil, she was constructed by John Brown & Co., Clydebank (Scotland) and her keel was laid on July 5, 1965, marking the start of her illustrious career. Her maiden voyage left Southampton on May 2, 1969, bound for New York, and she has remained in service for the past 40 years. She had a spell as a military ship from 1982, when she was requisitioned to serve as a troop carrier during the Falklands War, and during her military career QE2 successfully sailed more than 14,900 miles. Post-war, she has had many refits, including a headline-grabbing total refurbishment in 1994 to turn her into a 21st-century luxury liner. In

November 2008, QE2 retired to a new life in Dubai World, where she began her conversion to a floating hotel, and the last chapter of her exceptional life in service will close.

Ford's classic '32, equipped with a behemoth engine and modified for speed is everything a hot rod should be. They certainly don't make 'em like this anymore. We're talking about the

car that launched the hot rod subculture: Ford's 1932 Deuce. With its stylish lines, timeless grille, and flowing fenders, Ford's Deuce coupe pretty much defines the term "hot rod." The breadth of creativity this classic design has inspired for generations of hot rod builders is on full display in Deuce. Ford's '32 was an immediate hit. By 1931, the Model A was obsolete in a marketplace where drivers wanted more style and power. The design goals for the '32 Ford could be summarized as "more": more cylinders, more horsepower, and more style. The resulting car achieved its objectives and then some. It was faster, more comfortable, more refined - a masterpiece

of industrial design, yet still affordable. Henry Ford and his design team got it right. As the Deuce transitioned to the used car market, it drew the attention of those with a need for speed. Stripped down with an emphasis on performance, the Deuce became the bedrock of the burgeoning hot rod movement. To this day, it very much defines what a hot rod should look like. Hot rodders took Henry's master stroke to a whole other place, and Deuce stands as a tribute to their ongoing ingenuity.

The Mazda Miata is one of the most popular sports cars on the road today.
