Long Walk to Freedom Penguin The Sustainable Development Goals were launched in 2015 with grand ambitions for ending poverty, protecting the planet, and ensuring prosperity for all, with 'no one left behind'. However, these goals will be impossible to achieve without addressing inequity, inequality, marginalisation, and exclusion related to gender, and to other intersecting social hierarchies linked to deeply emotional, culturally bound norms and judgements of

worth. This book asks readers to consider issues of knowledge, power, and effectiveness, emphasising the limits of taking a categorical approach to gender and other social hierarchies, and the importance of process in what is known about generating transformative social change. Engendering Transformative Thinking and Practice in International Development draws on a range of real world examples which demonstrate both the limitations of the frameworks currently in use, and the very real possibilities for change when the intersecting social hierarchies that sustain and create inequity and inequality are challenged. This book brings together theoretical perspectives on social change, gender, intersectionality, and forms of knowledge, concluding with a set of proposals for revitalising a change agenda that recognises and engages with intersectionality and practical wisdom. Perfect for students and scholars of social change, gender, and development, this book will also be useful for practitioners looking for new ideas to help to generate social change.

Law Office Computing John Wiley & Sons "Bali, Engle, and Murray have produced a highly accessible introduction to the techniques and evidence of modern empirical asset pricing. This book should be read and absorbed by every serious student of the field, academic and professional." Eugene Fama, Robert R. McCormick Distinguished Service Professor of Finance, University of Chicago and 2013 Nobel Laureate in Economic Sciences "The empirical analysis of the cross-section of stock returns is a monumental achievement of half a century of finance research. Both the established facts and the methods used to discover them have subtle complexities that can mislead casual observers and novice researchers. Bali, Engle, and Murray's clear and careful guide to these issues provides a firm foundation for future discoveries." John Campbell, Morton L. and Carole S. Olshan Professor of Economics, Harvard University "Bali, Engle, and Murray provide clear and accessible descriptions of many of the most important empirical techniques and results in asset pricing." Kenneth R. French, Roth Family Distinguished Professor of Finance, Tuck School of Business, Dartmouth College "This exciting new book presents a

thorough review of what we know about the cross-section of stock returns. Given its comprehensive nature, systematic approach, and easy-to-understand language, the book is a valuable resource for any introductory PhD class in empirical asset pricing." Lubos Pastor, Charles P. McQuaid Professor of Finance, University of Chicago Empirical Asset Pricing: The Cross Section of Stock Returns is a comprehensive overview of the most important findings of empirical asset pricing research. The book begins with thorough expositions of the most prevalent econometric techniques with in-depth discussions of the implementation and interpretation of results illustrated through detailed examples. The second half of the book applies these techniques to demonstrate the most salient patterns observed in stock returns. The phenomena documented form the basis for a range of investment strategies as well as the foundations of contemporary empirical asset pricing research. Empirical Asset Pricing: The Cross Section of Stock Returns also includes: Discussions on the driving forces behind the patterns observed in the stock market An extensive set of results that serve as a reference for practitioners and academics alike Numerous references to both contemporary and foundational

research articles Empirical Asset Pricing: The Cross Section of Stock Returns is an ideal textbook for graduate-level courses in asset pricing and portfolio management. The book is also an indispensable reference for researchers and practitioners in finance and economics. Turan G. Bali, PhD, is the Robert Parker Chair Professor of Finance in the McDonough School of Business at Georgetown University. The recipient of the 2014 Jack Treynor prize, he is the coauthor of Mathematical Methods for Finance: Tools for Asset and Risk Management, also published by Wiley. Robert F. Engle, PhD, is the Michael Armellino Professor of Finance in the Stern School of Business at New York University. He is the 2003 Nobel Laureate in Economic Sciences, Director of the New York University Stern Volatility Institute, and co-founding President of the Society for Financial Econometrics. Scott Murray, PhD, is an Assistant Professor in the Department of Finance in the J. Mack Robinson College of Business at Georgia State University. He is the recipient of the 2014 Jack Treynor prize.

Guide to Computer Forensics and Investigations Addison-Wesley Professional Updated with the latest advances from the field, GUIDE TO COMPUTER FORENSICS AND INVESTIGATIONS, Fifth Edition combines all-encompassing topic

coverage and authoritative information from seasoned experts to deliver the most comprehensive forensics resource available. This proven author team's wide ranging areas of expertise mirror the breadth of coverage provided in the book, which focuses on techniques and practices for gathering and analyzing evidence used to solve crimes involving computers. Providing clear instruction on the tools and techniques of the trade, it introduces readers to every step of the computer forensics investigation-from lab set-up to testifying in court. It also details step-by-step guidance on how to use current forensics software. Appropriate for learners new to the field, it is also an excellent refresher and technology update for professionals in law enforcement, investigations, or computer security. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. **Byte** Springer Publishing Company PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Optimizing K-12 Education through Online and Blended LearningIGI Global **McElhaney's Trial Notebook** Baen Books The integration of information and communication technologies in education is unavoidable, as an increasing percentage of educators embrace modern technology, others are faced with the decision to reevaluate their own pedagogical practices or become obsolete. To meet the needs of students, one must first define what stipulates a successful K-12 student, the best practices of online classrooms, the warning signs for low-performing students, and how to engage web-based students. Optimizing K-12 Education through Online and Blended Learning addresses the models, support, cases, and delivery of K-12 online education. Seeking to further the conversation about the most effective ways to integrate ICT into the classroom, this publication presents theoretical frameworks to support educators and administrators. This book is an essential collection of research for teachers, administrators, students of education, IT professionals, developers, and policy makers. **PC Mag** SAGE Maritime trade is an essential lifeline for the remote island nations of the Pacific, which rely almost entirely on imports for essential goods. This study aims to foster dialogue

among governments and development partners on how to leverage smart ports to support trade, resilience, and more inclusive economic growth across the region. It examines practical applications of smart ports in the Pacific context and explores options to align international best practices with unique local features such as relatively small trade volumes, geographic isolation, and vulnerability to extreme weather events. The study makes recommendations on how to achieve short-term "wins" by implementing technology and business process solutions, and provides a strategic framework for developing more robust smart port ecosystems over time. **PostScript Language Reference** Asian Development Bank Problem-driven political economy analysis holds considerable promise to help development practitioners identify what policies and strategies are most likely to succeed in addressing difficult and persistent development challenges. This volume is the result of a systematic effort to take stock of what the World Bank has learned from efforts to mainstream this approach. The eight cases presented here are good practice examples that illustrate and reflect on what the Bank has been able to achieve in this area so far. Each

chapter begins with a discussion of the specific development challenge that prompted and drove the analysis. These challenges include a mining resource boom in Mongolia, a subsidy reform in Morocco, an electricity sector reform in the Dominican Republic, an electricity and telecommunications reform in Zambia, the development of inclusive commercial agriculture in Ghana, an infrastructure provision at subnational levels in Sierra Leone, a local infrastructure provision in Papua New Guinea, and a local roads and health provision in the Philippines. Summarizing the key findings and feasible policy recommendations proposed by the analysis, each chapter provides examples of how donors can adapt to existing political economy conditions or expand the space for reform in the countries and sectors where they work.

Recommendations range from designing politically responsive policy to enhancing the information available to local actors to fostering multistakeholder engagement. Finally, each chapter reflects on the uptake and impact of the problem-driven analysis on Bank operations and policy dialogue. Given these examples, it is possible to conclude that a stronger focus on how politics and economics intersect to shape particular development issues

can change the way donors design and implement projects. *Trading in Danger* Bloomsbury Publishing This document is designed to be a resource for those Linux users wishing to seek clarification on Linux/UNIX/POSIX related terms and jargon. At approximately 24000 definitions and two thousand pages it is one of the largest Linux related dictionaries currently available. Due to the rapid rate at which new terms are being created it has been decided that this will be an active project. We welcome input into the content of this document. At this moment in time half yearly updates are being envisaged. Please note that if you wish to find a 'Computer Dictionary' then see the 'Computer Dictionary Project' at http://computerdictionary.tsf.org.za/ Searchable databases exist at locations such as: http://www.swpearl.com/eng/scripts/dictionary/ (SWP) Sun Wah-PearL Linux Training and Development Centre is a centre of the Hong Kong Polytechnic University, established in 2000. Presently SWP is delivering professional grade Linux and related Open Source Software (OSS) technology training and consultant service in Hong Kong. SWP has an ambitious aim to promote the use of Linux and related Open Source Software (OSS) and Standards. The vendor independent

positioning of SWP has been very well perceived by the market. Throughout the last couple of years, SWP becomes the Top Leading OSS training and service provider in Hong Kong. http://www.geona.com/dictionary?b= Geona, operated by Gold Vision Communications, is a new powerful search engine and internet directory, delivering quick and relevant results on almost any topic or subject you can imagine. The term "Geona" is an Italian and Hebrew name, meaning wisdom, exaltation, pride or majesty. We use our own database of spidered web sites and the Open Directory database, the same database which powers the core directory services for the Web's largest and most popular search engines and portals. Geona is spidering all domains listed in the non-adult part of the Open Directory and millions of additional sites of general interest to maintain a fulltext index of highly relevant web sites. http://www.linuxdig.com/documents/dictionary.php LINUXDIG.COM, "Yours News and Resource Site", LinuxDig.com was started in May 2001 as a hobby site with the original intention of getting the RFC's online and becoming an Open Source software link/download site. But since that time the site has evolved to become a RFC distribution site, linux news site and a locally written

technology news site (with bad grammer :)) with focus on Linux while also containing articles about anything and everything we find interesting in the computer world. LinuxDig.Com contains about 20,000 documents and this number is growing everyday! http://linux.about.com/library/glossary/blglossary.htm Each month more than 20 million people visit About.com. Whether it be home repair and decorating ideas, recipes, movie trailers, or car buying tips, our Guides offer practical advice and solutions for every day life. Wherever you land on the new About.com, you'll find other content that is relevant to your interests. If you're looking for "How To" advice on planning to re-finish your deck, we'll also show you the tools you need to get the job done. If you've been to About before, we'll show you the latest updates, so you don't see the same thing twice. No matter where you are on About.com, or how you got here, you'll always find content that is relevant to your needs. Should you wish to possess your own localised searcheable version please make use of the available "dict", http://www.dict.org/ version at the Linux Documentation Project home page, http://www.tldp.org/ The author has decided to leave it up to readers to determine how to install and run it on their specific systems. An alternative form of the dictionary

is available at: http://elibrary.fultus.com/covers/technical/linux/guides/Linux-Dictionary/cover.html Fultus Corporation helps writers and companies to publish, promote, market, and sell books and eBooks. Fultus combines traditional self-publishing practices with modern technology to produce paperback and hardcover print-on-demand (POD) books and electronic books (eBooks). Fultus publishes works (fiction, non-fiction, science fiction, mystery, ...) by both published and unpublished authors. We enable you to self-publish easily and cost-effectively, creating your book as a print-ready paperback or hardcover POD book or as an electronic book (eBook) in multiple eBook's formats. You retain all rights to your work. We provide distribution to bookstores worldwide. And all at a fraction of the cost of traditional publishing. We also offer corporate publishing solutions that enable businesses to produce and deliver manuals and documentation more efficiently and economically. Our use of electronic delivery and print-on-demand technologies reduces printed inventory and saves time. Please inform the author as to whether you would like to create a database or an alternative form of the dictionary so that he can include you in this list. Also note that the author considers breaches of copyright

to be extremely serious. He will pursue all claims to the fullest extent of the law. **Multiple-Criteria Decision-Making (MCDM) Techniques for Business Processes Information Management** IGI Global

"Filled with fast-paced action and well-conceived characters."—Booklist
Kylara Vatta is the only daughter in a family full of sons, and her father's only child to buck tradition by choosing a military career instead of joining the family business. For Ky, it's no contest: Even running the prestigious Vatta Transport Ltd. shipping concern can't hold a candle to shipping out as an officer aboard an interstellar cruiser. It's adventure, not commerce, that stirs her soul. And despite her family's misgivings, there can be no doubt that a Vatta in the service will prove a valuable asset. But with a single error in judgment, it all comes crumbling down. Expelled from the Academy in disgrace–and returning home to her humiliated family, a storm of high-profile media coverage, and the gaping void of her own future–Ky is ready to face the inevitable onslaught of anger, disappointment, even pity. But soon after opportunity's door slams shut, Ky finds herself with a ticket to ride– and a shot at redemption–as captain of a Vatta Transport ship. It's a simple assignment: escorting one of the Vatta fleet's oldest ships on its final voyage . . . to the scrapyard. But keeping it simple has never

been Ky's style. And even though her father has provided a crew of seasoned veterans to baby-sit the fledgling captain on her maiden milk run, they can't stop Ky from turning the routine mission into a risky venture–in the name of turning a profit for Vatta Transport, of course. By snapping up a lucrative delivery contract defaulted on by a rival company, and using part of the proceeds to upgrade her condemned vehicle, Ky aims to prove she's got more going for her than just her family's famous name. But business will soon have to take a backseat to bravery, when Ky's change of plans sails her and the crew straight into the middle of a colonial war. For all her commercial savvy, it's her military training and born-soldier's instincts that Ky will need to call on in the face of deadly combat, dangerous mercenaries, and violent mutiny. . . . "Compelling . . . a superior novel . . . Trading in Danger [has] originality and intelligence."—SciFi PC Mag Infinite Study PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. <u>Newsweek</u> World Bank Publications
Murder, mystery, and interstellar intrigue! Lassti, a newly discovered planet, is the center of political intrigue. Recently the planet survey team's physicist was found dead. Was he killed? If so, by who? One of his fellow surveyors? Or by one of the birdlike natives of Lassti? This is, if they are intelligent at all, which is proving hard to tell. Into this mix arrives Tocohl, a Hellspark trader who just wanted to have a vacation. After being attacked, rescuing a young woman, and going before a judge, Tocohl has learned all she ever wanted to know about being in the wrong place at the wrong time. Now she is seeking answers to mysteries that could save a world. Hellspark, in particular, is one of our very favorite novels in any genre. All of Janet's excellencies are apparent as she explores the interfaces of culture, language, intelligence, and what it means to be human. If you have not read Hellspark, you must do so immediately. It's that good."—Sharon Lee and Steve Miller, coauthors of the best-selling Liaden Universe® series "An absolute delight."—Mike Resnick At the publisher's request, this title is sold without DRM (Digital Rights Management).
